Art Unit: 1794

1. The 112 claim rejections are maintained.
2. The art rejections have been withdrawn in view of the present amendment.

Creighton does not teach or suggest a film adhesive wherein a curative component is separated from uncured resin component during storage of the film at the ambient temperature.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on April 30, 2009 was filed after the mailing date of the Office Action on February 10, 2009. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 7, 9-18, and 24-30 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The spatial relationship of a porous body, an uncured resin component and a curative component is critical or essential to the practice of the invention, but not included in the claims is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The uncured resin is converted to a low viscosity material when heated to curing temperature to provide a rapid flow into the porous body. The relative position of the uncured resin and the curative component within or on the

Art Unit: 1794

porous body is essential for adequate mixing of the uncured resin with curative component and penetration into the porous body (paragraphs 1 and 11 of the specification of the present invention). These special features are not reflected in the claims.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 7, 9-18, and 24-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim appears to be grammatically ambiguous so as not to clearly and accurately convey the spatial relationship of the porous body, the uncured resin component, the removable reaction barrier and the curative component. The current phraseology is unclear as to how these three claimed elements are arranged. The scope becomes unclear since it is not determinable what structure can fall within the scope of the claim. Various interpretations, including some radically different arrangements are possible but do not seem within the scope of the disclosed invention.

Allowable Subject Matter

8. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the prior art taken alone or in combination teach or suggest the composite material having a recited structure set forth in the claim.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
